

is the perfect software that comes with multiple save options so that users can easily convert JFIF (JPEG .JPG file) to JPEY (JPG files, 326 Å— 326 dots). 12. Work on lighting 36rThe next morning after the flight was clear and sunny. Despite the fog, visibility was excellent. The morning air smelled of the sea and salt." Rod, summer pictures When reading in sunlight, you see more detail in a portrait. And everything looks pretty good if you shoot with a high definition camera. You don't need a flash for sharp shots, but if you're shooting indoors, at dusk, or in a fog where there isn't enough light, a flash can still help. This chapter will help you better understand why bracketing is needed and how to use it. 15. Editor window The editing window is exactly the same as the regular editor
