You come back a day later and when you watch the movie again, it is changed. You may have seen a movie or a show that had that effect on you. What would it be like if you could make the same thing for the computer?" The idea behind Screen Savers is simple yet effective: watching your favorite films or playing your favorite games with windows on the screen while the operating system continues to work in the background. To create a new project, you can choose between two major options: screensavers or pictures from your hard drive. Both procedures involve the same set of steps. To get started, click on 'Add Screensaver' and select an appropriate template. If you want to keep your computer in the idle state longer, you will be required to select 'Idle' from the templates drop-down menu.
