Aim Lab is a unique training tool for using your mouse. [url= [url= Смотрите текст на языке: Русский. The aim of the lab was to create a strategy game that allows the player to take over an opponent's station using only one type of weapon (gun) in a local environment. Using persistent entities (ping pong ball, player, bullets, windows, walls) the player can change the environment and the opponent's strategy, but cannot alter the physics of the game. This concept required the player to constantly consider how much energy he needed to shoot in order to kill the opponent, as well as how to move around the level to achieve a given objective. This concept requires the player to constantly consider how much energy he needs to shoot
