Van Helsing is a third person action-adventure game set in 19th Century London. A new monster, the infamous spectre Jack the Ripper, has just been released to London, to start terrorising the residents and everyone that he sees. Lady Katarina van Helsing, a lady in search of justice, decides to hunt down this new monster. Van Helsing has a fast paced and innovative combat system, relying on the Focus-Focus-Focus (FFF) mechanic. Van Helsing's fierce combat system allows the player to rapidly switch between different attacks to quickly deal great amounts of damage with minimal inputs. And best of all, FFF allows Van Helsing to have access to a unique arsenal of abilities that are present when she is at maximum Focus-Focus-Focus. If Van Helsing is taking damage, she will automatically gain Focus. And Focus will be regained after 1 second of gameplay when not taking damage. The remaining 5 seconds will be spent at the maximum Focus that Van Helsing has. Van Helsing's maximum focus is gained by striking enemies with a lightning-fast attack. The game also features non-combat focused actions, such as sneaking, searching for items or

interacting with objects. Van Helsing relies heavily on stealth as she attempts to unravel the puzzle of the all new monster Jack the Ripper. How Van Helsing will unravel this mystery remains to be seen, so be sure to put your wits to the test in this monster-hunt with the legendary Van Helsing. Key Features Perma-Death - Van Helsing has a guaranteed chance of surviving after dying once. Resurrect - When Van Helsing resurrects, she is completely ready to take on the battle and is not removed from any skills. All abilities are on a single skill tree with the exception of Multi-Teleport, which is on a separate skill tree. This allows Van Helsing to gain access to skills which is unlikely to be available in the pre-release content. Vengeful Lady - Van Helsing has a chance to deal a Shadow Damage to nearby enemies when she is under enemy attack Aura of Counterbalance - Each Rage point spent grants Van Helsing some HP. Ghostly Mirage - Summons two extra Van Helsing's who fight exactly like Van Helsing. New Trick - Van Helsing has a chance to create an aura on the exact spot where her attack has previously landed: this effect decreases the movement, attack and casting speed of c9d1549cdd

The idea for Interactive Horror Stories came from a 2014 Ludum Dare jam. I quickly realized that horror games are always common: zombies, games in which you do not know what's going on, etc... But rarely you find games that are actually interactive. Have something that changes depending on your decisions. At this point, I didn't have much to build and quickly put together a prototype. It was a rough prototype, but it worked. The game started as a simple shooter when the original idea came to me. But in the first version, when you die, you see a cutscene of you dying and your enemy triumphs and then it ends. I added the mechanic that you don't see the cutscene, but instead the enemy is right there. This made the game more interesting for me. It made the choice between running away or fighting, for example, more interesting. Because when you die, it isn't about killing your enemy, but about surviving and escaping. Also, I added a second enemy to the game, who you must defeat to defeat the bad entity you have awakened. Game "Interactive Horror Stories" feedback: I really appreciated the feedback I got. In particular, I really liked the suggestions of people that understood what I was trying to do with this game. I added options about the entities I added into the game. So, now you can choose whether you see the cutscenes of you dying or a quick death. You can also choose the kind of entities you will encounter. I added a Horror Level and a Supernatural Levels, depending on the choices you make in the story. Why are you being mean to these people? = _____ (it's always an Entity) You are granted a special permission to continue. You won't be harmed. The Entity is that of a generic entity, that acts as a killer in the game. Except, you wake up and the Entity is already there. You are now forced to fight it, and you can gain random bonuses such as health, and shields if you defeat it. Translate Top Blogs Insights & Events Saturday, June 13, 2009 Otwa has always lived near the sea. While an earldom might have given him safe seclusion from his people, salt-water pollution has destroyed most of the large city's ornamental gardens and the high old walls of the city are crumbling. Few people, especially those in the merchant guilds of Otwa, use the sea as their primary means of trade. Otwa sits in the heart of the Kingdom of Ysantir, a vast and treacherous land where the tide of battle and conquest has ebbed and flowed for millennia. In recent times, Ysantir has gained significant strength, and Otwa is keenly interested in the succession to the Kingdom. Otwa's two most immediate neighbors are the Maroys, a warlike nation to the West and the Shouris, a powerful and expansionist nation to the South. Otwa's large southern neighbor has interests in trading in the region's internal hinterland which Otwa would gladly see cut off by an alliance. Also on its frontier, Roo, a nation primarily of peasant farmers from the West, is a rival to Otwa's position as the dominant trading power in that region. Such is the outer edge of civilisation in the region. Given this confusing mosaic of dynastic conflicts and alliances, the people of Otwa are prepared to look with favor on a principled and quiet ruler who does not threaten the existence of their immediate neighbors. Indeed, Otwa sent envoys to the court of Vancleef when its two most powerful neighbors were at war, and several of his ancestors were sent as ambassadors to the court of Anseig and their descendants had links with Anseig's ruling dynasty for centuries. Otwa supports the current crown's attempts to establish a new line, recognising their right to the succession. As such, Otwa will gradually expand its connections to the new dynasty, seeking alliances where either is advantageous. "To be trusted in the guardianship of the Crown is something the Diadem may be proud of." ***** Installation instructions ===== The Cessna 152 is an American training aircraft and a low-wing, low-pitch-tail and strut-braced, T-tail tricycle-gear monoplane designed by the Cessna Aircraft Company. It is the primary trainer for the United States Military and United States Air Force and is also operated by civilian pilot training schools and flight schools worldwide as well as several civil operators. The aircraft has flown over 100 million flight hours since first flying in 1957. The Cessna 152 has been manufactured by Cessna since 1958, and the Cessna 152K variant has been manufactured since 1968. The design of the Cessna 152 is derived from the Douglas DC-3. The Cessna 152 has been redesigned for the commercial industry and has performed well in that market. Today, the Cessna 152 is used to train pilots in certificate programs as a multi-engine, multi-pilot aircraft. In addition to its 2-seater configuration, the Cessna 152K has been manufactured for a single pilot. The Cessna 152 and 152K have a fuselage of welded steel tube construction and are characterised by "angle-edge" wings. The Cessna 152-113 was the first Cessna built with Raytheon winglets. Another distinguishing feature is the Cessna 152's use of tricycle undercarriage, instead of conventional fixed landing gear. Most Cessna 152
