What's new in Elden Ring:

- ❑ Evolution of Solo Gameplay The main game quest of *Tarnished World* is a completely seamless quest. You won't be forced to play against others directly. ❑ Touch Screen exclusive Character Management Using a touch screen, you can navigate the character management screen more quickly and easily. You can easily move your character in battle while watching a play-by-play with the button, drag & drop the character when moving them, and search your items by groups or a specific attribute with the touch screen. ❑ Different Online Presentation Synchronously and simultaneously match with other players online. Increase the number of players and teams available for PvP in order to concentrate the battle ratio.

If your PvP ranking is high enough, you can join ranked PvP matches with other players for free. Players in PvP matches will be separated into teams for convenience.

A Unique Item System and Value Function

- 1) A New Combination System Based on Item Basics The game uses a combination of type, attribute, and subclass. In addition to the items that can be freely changed, five types of progress conditions like status or cooperation are set to the items. In the type items, when the character's status is weakened or changed, he is found to participate in battle with an item. A new feature is customization, whereby attributes can be combined for a certain item to produce a class for the item. Concerning the valuation function, even if the attribute, status, and subclass are increased, it will be deducted if the item is destroyed.
