- The programming language is Python 3. - You can customize the world by changing sizes, shapes, colors, etc. But keep in mind that each combination has a cost in processing time. - Controls - WASD keys or arrow keys to move - Mouse - to move map and change values - Space - to upgrade the form - F - to open the menu and take a decision - Keep in mind that speed changes when going through traps - The whole world is randomly generated, but you can change that also when making a new game

Funny things in the game There is a fan-made story if you like A lot of references in the game in general (code is Python and some of them are in the names of functions) Thanks for reading. If you want to make a video explaining the concept or if you want to play the game on your own, it's easy to do and you can find the code here: [The Virus](#) If this sounds like something you're interested in, if you want to see my other videos, here are my rts games: - [The Line of Defense](#) - a tower defense game - [The Sandbox](#) - a sandbox game

That's all for today. Remember to like and subscribe and join the Discord server. See you soon!

A: Far from world ending, it was just as easy to say 'don't destroy the world'. Simply by having the world be randomly generated, there are several world endings that you could have without destroying the world.

A: I think it's a cool game. I don't want it to happen.

On the eve of the second Democratic primary debate, the DNC announced that former vice president Joe Biden will be the only one on stage following the departure of Sen. Bernie Sanders on Thursday morning. "Sen. Bernie Sanders has a history of unreliability when it comes to events in our state and to make sure that Donald Trump is re-elected, I think we need to make sure that Trump gets the credit for taking on, and winning in the first place," Biden told reporters. "I think it's time for Democrats to turn that page and move on. I think it's time for Democrats to come together and start working to elect Hillary Clinton to be president." The debate will be moderated by NBC News anchor Lester Holt, and will be

## **Game Description:**

This is a game of quick tactical action, involving camouflaged units lying in wait for a chance to strike from the edge...

Eccentric Hollywood director Brian Koppelman, best known for Spike Lee's film "Do the Right Thing" and the Oscar-nominated "Ocean's Eleven", will provide insight into the creation of the setting for the new campaign, known as "Homeland Security." In a remote pacific outpost, under the command of the US forces, the Viet Cong has established a new base. Playing as one of several teams, players will need to seize and secure what remains of the outpost, and eliminate the terrorists infiltrating the area. "Rising Storm 2: Vietnam - Homeland Security Cosmetic DLC" offers players different scenarios and challenges as they free the area from enemy control.

Set deep within the jungle of the Vietnamese peninsula, players will need to hijack the area's enemy communications system, prevent civilians from succumbing to a deadly epidemic, and fight the local KDDs for control of the territory before the enemy can mount a devastating counter-offensive.
