Math ? MathCore allows access to the underlying C++ code to extend AutoCAD functionality. Advanced User ? Advanced User is a set of macros, functions, classes and tools, designed to ease the tasks of experienced users of AutoCAD. Product activation All AutoCAD products and all versions of AutoCAD are based on AutoCAD LT. The license software is updated to the latest released software, automatically. A person can be registered to the same license and not all features of the software can be used simultaneously by that person. The person's AutoCAD is activated using that person's license number. AutoCAD and Autodesk software Some of the software and programming used in AutoCAD is developed by Autodesk. AutoCAD is also the underlying software that supports AutoCAD Design Suite software, including the Civil 3D, Mechanical Design Suite, Structural Design Suite, and Architectural Design Suite. A free student version of AutoCAD called AutoCAD LT is included in the Autodesk Design Suite. AutoCAD is part of the Autodesk AutoCAD Productivity Suite. The suite also includes AutoCAD Architecture, which is used for architecture design, AutoCAD Electrical, which is used for electrical, plumbing, mechanical design, and AutoCAD MEP, which is used for mechanical, engineering, electrical, and plumbing design. The various individual programs in the AutoCAD Productivity Suite can be used separately. For example, AutoCAD LT can be used on Windows or macOS with the free Student version, while AutoCAD Architecture can be used on Windows, macOS, or Linux with a license for AutoCAD Architecture. The AutoCAD Productivity Suite was discontinued in 2019, replaced by three separate product lines: AutoCAD Productivity Suite, AutoCAD Civil 3D and AutoCAD MEP. AutoCAD design software products were renamed to align with the new naming conventions. Release history The history of AutoCAD is as follows: Rendered view The view available in AutoCAD, based on the drawing, with the addition of the following extra tools: 2D and 3D solids; Mesh objects and 3D blocks; layout and floor plans; mesh and polyline area tools; perspective views; window with a snap view and area with a snap view. Markup Assist scans your marked up drawings to improve the accuracy of the autocad 2D drawing. In the Autodesk website, you can compare your 2D drawing with the 2D drawing generated by AutoCAD's Markup Assist. Additionally, Markup Assist generates a 3D model automatically. The result is a 3D model that shows the shared edges of the 2D drawing and the 3D model. This information is used by the Autodesk 3D modeling tools to improve the accuracy of the 3D model.
